NEVER SETTLE™

FOOTWEAR TECHNOLOGY

Mizuno court shoes are made for foot types, rather than body types. Utilizing cutting edge innovations such as the award winning Wave Technology, the leading technology that offers cushioning and stability together, Mizuno's full line of performance footwear enhances the Athletic experience for all types of athletes.

The leading footwear technology that combines cushioning and stability, two distinctly different elements that are both inherently necessary in great running shoes.

Lightweight, responsive, yet durable cushioning copolymer.

Suspension system which connects the Wave plate to the ground, thereby enhancing stability and traction. Dual density heel Sensorpoints enhance support properties of Wave Technology.

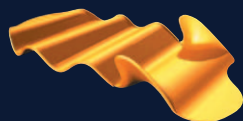

Full-length midsole ventilation system reduces heat and humidity build-up inside the shoe.

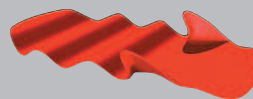

Provides the utmost in breathability and comfort of the upper.

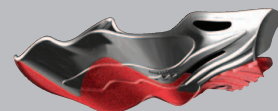

Shock-absorbing cushioning compound found in the **heel** and **forefoot**.

The DOUBLE FAN WAVE™ Technology provides premium motion control and excellent cushioning by utilizing a "double fan-shaped" Wave.

The PARALLEL WAVE™ Technology uniformly disperses shock throughout the sole, providing excellent cushioning and enhanced stability.

The COMPOSITE WAVE™ Technology is a combination of materials in an existing wave plate configuration to provide specific cushioning and stability.

MEN'S FOOTWEAR

Mizuno Plus

Mizuno Performance Layer Universal System™ for apparel provides optimal performance and protection through exclusive Mizuno technical fabrications and designs, based on specific function.

DRY: Enhances performance by moving perspiration away from the skin, keeping you dry and comfortable.

ACTION: Enhances performance by allowing the garment to move with you, reducing stress and friction.

PROTECTION: Enhances performance by repelling the elements, allowing maximum breathability, comfort, and protection.

THERMO: Enhances performance by maintaining core body temperature.

APPAREL TECHNOLOGY

D.E.CUT

Mizuno's design technology that coordinates fabric characteristics with specific sport patterns, eliminating stress and allowing unrestricted motion for better performance.

Mizuno's exclusive body cooling fabric technology that readily absorbs and releases body heat. Ice Touch™ efficiently eliminates heat from the skin as sweat vaporizes through its patented double layer construction keeping the body 2°-3° cooler than polyester or cotton!

DryLite™

A series of high performance technical fabrics designed with special yarn, fabric structure, and dyeing process. DryLite™ transports perspiration vapor away from the body, cooling down body temperature. DryLite™ is comfortable, breathable, easy to care for, and durable.

A series of high performance technical fabrics designed with special yarn, fabric structure and dyeing process. MzO™ transports perspiration vapor away from the body, cooling down body temperature. MzO™ is comfortable, breathable, easy to care for, and durable.
