

Ring Sizing Tool

How to use the Ring Sizing Tool

Print out this document, ensuring that in the print options you do not select the fit to page option. Measure the line below to ensure it is 5cm.

How to measure your ring size

Cut out the belt sizer and cut a slit where indicated. Push the opposite end through the slit and place around your finger, adjusting the sizer until comfortably fitting around your finger, checking you can move up and down over your knuckle easily.

Circle Sizer

For the best accuracy, use a ring that has a similar width band and style as the ring you wish to purchase. Place your ring over one of the circles below, find the circle that completely fills the inside of your ring without any overlapping. Your size is the letter shown within the circle.
