

Ionic Power Shower

AR - 01

Advanced De-chlorinating, Filtration and Water Saving Technology.

HEALTH BENEFITS

Enriched de-chlorinated water full of healthy negative ions from the unique Zeolite ceramic balls filter and advanced stainless steel Ionic plate, can help with hair loss, skin irritations, dandruff, respiratory conditions and fatigue.

UP TO 50% WATER SAVING*

Water is the soul of the earth and we have worked hard to design a product that embraces today's demands on water saving throughout the home. The Ionic Power Shower is WELS tested to a 3 star highest rating and flows at an average of 8 litres a minute. This is half that of a conventional shower without flow controller technology, which could operate up to 20 litres a minute.

SAFETY

This product conforms to the most stringent laboratory tests and quality accreditations throughout Australia with a WELS 3 Star highest rating, Watermark approval and TUV Rheinland in Europe.

EMPOWERING SHOWERING

The Ionic Power Shower with its unique water filtration system delivers significant health benefits of de-chlorinated, ionised water, combined with a refreshing zesty citrus aroma, every time you shower. This proven and unique, advanced water filtration system, which removes 90% of chlorine and harmful metals found in our domestic water supply, helps prevent water born diseases and can assist with reducing respiratory and skin conditions caused by chlorine, chloramines, bacteria and heavy metals.

Ten minutes of showering in chlorine saturated water is equal to the same amount we would absorb in our bodies by drinking 8 glasses of untreated tap water! No Shower head in Australia has this unique combination of filtering, which uses a ceramic zeolite balls filter, stainless steel mesh and limescale resistant ionic spray plate with 384 0.03mm microscopic perforations to ionise the relaxing water delivery.

The Ionic Power Showers specialist components are all replaceable with a ceramic zeolite balls filter, washers, rubber seals and mesh filter in a six-piece value kit.

WATER SAVINGS

Conventional Shower 146000 litres per year

Ionic Power Shower 58400 litres per year*

Water saving = 87600 litres
Water cost \$2 per kilolitre
Saving \$176.00 per year**

A family of four, showering once a day for five minutes each, could save up to 87600 litres a year. That's \$176 saved in water consumption bills.
 ** Illustration of water saving monetary value assumes a price per kilolitre (1000 litres) of \$2.00, water rates can and do vary across Australia.
