

Coffee Maker CLEANER

SINGLE CUP COFFEE MAKER CLEANER

Quickly removes lime and mineral build up from coffee makers and other appliances. Keeps your coffee maker clean for great tasting results.

DIRECTIONS

For sensitive skin, please wear household rubber gloves. Rinse sink and other cleaned items after using product. Always follow appliance manufacturer's instructions and precautions.

Single Cup Coffee Maker: Remove any used or unused coffee from machine. Add 1 oz of cleaner to water tank for every 2 cups of water. Place cup in coffee maker and run a brew cycle. After brew cycle is complete, discard contents down sink drain. Repeat until reservoir is empty. After cleaning is complete, rinse coffee maker thoroughly by cycling 2 reservoir tanks of fresh, clean tap water through machine. Wash reservoir before each cycle. Repeat cleaning procedures monthly to maintain coffee maker in its top operating condition.

Automatic Drip Coffee Maker: Remove any used or unused coffee from machine. Add 1 oz of cleaner to water tank for every 2 cups of water. Run solution through a complete cycle of the coffee maker. After cleaning is complete, rinse with 2 tanks of clean tap water. Run each tank of clean, tap water through a complete cycle of the machine. Repeat cleaning procedures monthly to maintain coffee maker in its top operating condition.
