MENU CONTENT DISCLAIMER

This complimentary menu was provided through The Vortex website as a courtesy to our customers. It is NOT a contract. While we do our best to keep this reference material up-to-date, please be aware that all information contained within our menus, including, but not limited to, individual menu items, descriptions, prices and company policies, are subject to change without notice.

TAKE-OUT ALCOHOL

This menu is has been provided for reference purposes only. By law, The Vortex is not allowed to sell any alcoholic beverages "to-go," with the exception of opened bottles of wine that are not finished by patrons when dining in-house. These bottles may be re-corked and taken home by the customer.

ADULTS ONLY IN THE VORTEX

In July of 2005 the "Georgia Smoke-Free Air Act" was passed. As a result, every restaurant owner in Georgia has been forced to choose between admitting minors or allowing their customers the option to smoke. Guess which option we chose? As it turns out, a majority of our patrons really enjoy eating, drinking and socializing in an "adult-only" environment. Therefore, you must now be at least 18 years old to enter The Vortex at any time.

BE RESPONSIBLE

Never drive impaired. We are always happy to call you a taxi. A cab ride is much cheaper than a D.U.I., and always safer than driving with a buzz. So cab it. You'll be glad you did. Especially when you wake up at home tomorrow morning, instead of in county jail.

SINGLE MALT SCOTCH (36 Varieties) – Measured 1.5 oz. Pour

Single Malt Scotch is malted-barley whisky produced in a single distillery. Scotch, which can only be made in Scotland, must be aged at least 3 years and be no less than 40% ABV. That is true for blends as well. Scotland is divided into six (6) whisky producing regions; Speyside, Lowlands, Highlands, Campbeltown, Islands and Islay. Each whisky produced is unique, and the malts from each region will have certain characteristics which differentiate them from the whiskies of other regions. These variations are the result of many factors including the use of specific raw materials, climate variations and subtle differences in production techniques.
